The Chem-SURF program is a Research Experience for Undergraduates (REU) Site at the University of California, Irvine funded by the National Science Foundation. Chem-SURF provides summer research opportunities for undergraduate students from other colleges and universities to conduct research at UCI.

Program highlights:
- 9-week summer research opportunity for undergraduate students to gain valuable research experience in an academic setting.
- Participants are provided housing and a stipend for living expenses.
- Opportunities to engage in original research guided by faculty mentors in UCI’s state-of-the-art research facilities.
- Students attend presentations, workshops, and seminars related to career planning, industry, and applying to graduate school.
- Program culminates with the Chem-SURF Research Symposium where students share their research accomplishments by presenting their findings.
