

UCI Health

Pediatric Gender Diversity Program

The UC Irvine Health Pediatric Gender Diversity Program offers Orange County's only interdisciplinary program dedicated to caring for transgender and gender-expansive children, teens and young adults through age 26.

Our team of specialists provides affirming, supportive care with a full range of services, which include:

- Patient and family counseling
- Puberty suppression
- Gender-affirming hormone therapy
- Community connections and support

Our physicians are experienced at working with young people whose gender identity or expression may be in conflict with their physical characteristics or with what others expect of them. Our goal is to help each child live happy, fulfilling and authentic lives.

For more info about our program and resources, visit: sites.uci.edu/genderdiversity or email genderdiversity@uci.edu.
